Tony,

I suggest the following minor changes:

Oregon Board of Forestry - Riparian Rule Analysis- On 9/3/14, the Oregon Board of Forestry voted unanimously in favor of continuing to analyze what changes might be needed in the Oregon Forest Practice Rules to provide greater buffer protections for medium and small fish bearing streams on private forest lands. Studies have shown that when applying FPA buffers to these waters, temperatures will increase above the State's "Protecting Cold Water" criterion 40% of the time. Contact: Alan Henning 503-687-7360.

Alan,

I want to add something for this week's submission on yesterday's BOF decision. Would you please take a look and let me know if this sounds accurate?

Oregon Cold Water Protection- The Oregon Board of Forestry voted on 9/3/14 unanimously in favor of continuing to analyze what riparian buffer changes are changes under the Oregon Forest Practices Act for protection of cold water in small and medium fish-bearing streams on private forest lands. Contact: Alan Henning 503-687-7360.
